

## Extended Benefits (EB) Overpayment Detection Measure CY 2015

State level data for the EB overpayment detection measure are very erratic for the calendar year (CY) 2015 measurement period. Estimated overpayments for this measure are based on the period June 1, 2014 to July 31, 2015, and overpayment recoveries are based on the period January 1, 2015 to December 31, 2015. The six-month lag reflects the period generally required by state Benefit Payment Control activities to identify and establish overpayments for recovery.

Because EB is an episodic program that triggers on and off according to the state's unemployment rate, improved labor market conditions during the period resulted in a sharp decrease in EB program outlays, from just around \$3 billion in calendar year of 2012 to \$0.3 million in the calendar year of 2015 (see chart).

These changes in EB program outlays can be even more dramatic at the state level. Therefore, many states reported relatively large EB overpayment recoveries in CY 2015 compared to program outlays during the 12-month period ending June 30, 2015. Many of these established overpayments reflect EB program outlays prior to April 1, 2012.

Additional information on the EB program is available at <http://workforcesecurity.doleta.gov/unemploy/extenben.asp>.

Notes: BPC EB data are for January 2015 to December 2015

BAM data are for July 2014 to June 2015

EB amount paid is for July 2014 to June 2015

^ Omits Florida data - inadequate BAM sampling

\* EB data estimated due to missing reports.

# Fraud and non-fraud recoverable overpayments; includes work search,

ES registration, and benefit year separation issues; excludes

base period wage, base period separation, and other miscellaneous issues.

+ Overpayments established adjusted for quarters for which EB data were not reported.

Excludes penalties assessed for fraud.

@ Excludes quarters in which insufficient BAM and/or BPC data were reported.

# N.A. Not Applicable
